HOTEL TV SYSTEM

IPTV BROADBAND VIDEO ON DEMAND

3viewTV, the Hotel TV services platform. Digital TV, Broadband and On Demand videos all in one box.

- **Full Freeview Digital TV channels**
The **3viewTV** system negates the need for traditional freeview STB's. The DTT aerial feed is connected directly into the system and **3viewTV** does the rest. This means the system automatically becomes more robust with less hardware involved in the reception of the TV programming.
- **Entertainment on Demand**
With on demand software your guests can choose the movies they require and watch them at their leisure. We offer support in arranging your content rights agreement with the studios.
- **High Speed Data**
Broadband can be accessed via the **3viewTV** Hotel portal offering a free or subscription wireless or wireline service.
- **Digital Signage**
Customised signage displays can be located throughout your hotel within the gym, bar, reception etc. Each screen can be customised to show local traffic routes, flight pages, advertisements, special events, corporate branding, welcome messages etc
- **Time Shifted TV**
Your guests have the ability to record TV programmes from their room, that they then can watch at a later time. Allowing them to have that business meeting or dinner without missing their favourite programme
- **Hotel Guest Portal**
The Hotel Guest Portal is customised to your requirements, logo, images etc. From here your guest has access to all the services available on **3viewTV**. These services could be general information such as restaurant open hours, local golf course information through to digital tv movies on demand, broadband access, and timeshifted tv.

**3viewTV is available from
Cotswold Communications Limited.
